Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

MIDUS 1 Project 1 Twin Screener

MIDUS 1 Project 1 Twin Screener

Abstract

The MIDUS Twin sample was obtained during the baseline MIDUS 1 data collection in 1995-96 and used the MIDUS Twin Screening Project to recruit one of the first national samples of twin pairs ascertained randomly via the telephone. By conducting screenings in multiple national samples, MIDUS was able to identify households with twin pairs (see Twin Screening Report for details). Those twin pairs who were eligible and willing to participate in MIDUS were administered a Twin Screener Questionnaire. Each twin was asked about their background, experience, and status as a twin. This self -report data was used to determine zygosity. The resultant MIDUS Twin sample comprised 1,914 individuals from 957 twin pairs.
