ICPSR PROCESSING NOTES FOR #4652
Midlife in the United States (MIDUS 2), 2004-2006
DS4: M2_P1_SAQxPhone Data

1. **Variable Link:** The variable **M2ID** is the individual-level linking variable for the MIDUS datasets. The variable **M2FAMNUM** is the household-level linking variable for the MIDUS datasets.

2. **Variable Differences:** Some variables that are included in the data set released by ICPSR are not referenced in the P.I. documentation; no further information was provided.

3. **Constructed and Derived Variables:** Some scales and variables in the collection were constructed to measure psychometric and psychosocial factors. Users are encouraged to refer to the constructed variables documentation included with this data collection for additional information.

4. **Additional Information:** For additional information on the Midlife in the United States survey series, please visit the MIDUS website.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
